1.3 Feedback

1.4 Acknowledgments

I would like to thank the following people for using the *CleanThesis* style and giving feedback to me, e.g., features, bugs.

- **Anton Augsburg** in his project thesis
  http://antonaugsburg.de/ (in German only)

- **Mathias Frisch** in his dissertation (PhD)
  http://wwwpub.zih.tu-dresden.de/~frisch/

- **Sebastian Kleinau** in his bachelor thesis
  http://www.sk-downloading.de/ (in German only)

1.5 Prerequisites

The follwing section gives an overview of all resources required by this package.

1.5.1 Requirements

2 User Guide

2.1 Package Options

All package options are given in ⟨*key*⟩=⟨*value*⟩ notation. The value true can be omitted for all boolean keys, e. g., sansserif without a value is equivalent to sansserif=true.

All of the following options must be used as cthesis is loaded, i. e., in the optional argument to \usepackage.

sansserif=true, false   default: false

Sets whether to use a sans serif font or not.

hangfigurecaption=true, false   default: false

hangsection=true, false   default: true

hangsubsection=true, false   default: true

figuresep=none,colon,period,space,quad,endash   default: endash

This option can be used to define a different label separator for cations of figures. The following value are allowed:

none	Inserts no character in between.
colon	Inserts a colon (:) in between.
period	Inserts a period (.) in between.
space	Inserts a single space character in between.

quad	Inserts a \quad in between.
endash	Inserts an en dash (–) in between.

colorize=full,reduced,bw   default: full

colortheme=bluemagenta,bluegreen   default: bluemagenta

bibsys=biber,bibtex   default: bibtex

Sets whether to use biber or bibtex as citation management tool (engine). The default (still) is bibtex.

"Biber [is] a BibTeX replacement for users of BibLaTeX", see <http://biblatex-biber.sourceforge.net/>.
