1.5 Prerequisites

The following section gives an overview of all resources required by this package.

1.5.1 Requirements

2 User Guide

2.1 Package Options

All package options are given in $\langle key \rangle = \langle value \rangle$ notation. The value `true` can be omitted for all boolean keys, e.g., `sansserif` without a value is equivalent to `sansserif=true`.

All of the following options must be used as `cthesis` is loaded, i.e., in the optional argument to `\usepackage`.

`sansserif=true, false` default: false

Sets whether to use a sans serif font or not.

`hangfigurecaption=true, false` default: false

`hangsection=true, false` default: true

`hangsubsection=true, false` default: true

`figuresep=none,colon,period,space,quad,endash` default: endash

This option can be used to define a different label separator for citations of figures. The following values are allowed:

`none` Inserts no character in between.

`colon` Inserts a colon (:) in between.

`period` Inserts a period (.) in between.

`space` Inserts a single space character in between.

`quad` Inserts a `\quad` in between.

`endash` Inserts an en dash (–) in between.

`colorize=full,reduced,bw` default: full

`colortheme=bluemagenta,bluegreen` default: bluemagenta
